Emerging Trends
Rule 23 Certification of Mass Environmental Torts................ 1
By Gary M. Zwain and Erzebet M. Pifko
Rule 23(a) Requirements............................................ 1
Rule 23(b) Requirements ........................................... 3
Certification Under Rule 23(b):
Differing Approaches ............................................ 4
Conclusion..................................................................... 8

A Troubling Trend Needs Reform
Defending Environmental Citizen Suits......................... 9
By Patrick J. Shea and Richard S. Davis
Introduction .................................................................. 10
Responding to a Notice of Intent: Can a Facility Come into Compliance and Avoid the Lawsuit? ..................... 10
The Complaint Is Filed: Settle or Try to Shave Claims?.......................................................... 11
Notice of Specific CWA Violations
Is Required ..................................................................... 11
Citizen Suit Plaintiffs Must Show Standing 12
Rendering Injunctive Relief Moot
Through Compliance..................................................... 13
Prevailing Plaintiffs in Citizen Suits Recover Attorneys’ Fees ............................................................... 14
Plaintiffs Can Easily Open the Door to Fees ...... 14
Federal Rule 68 Offers May Have a Role in Citizen Suits ................................................................ 15
Thinking About the Next One: Bringing a Citizen Suit Will Only Get Easier .............................. 15
Suggested Reforms to Environmental Citizen Suits ........................................................................ 16

A Look Beyond the Place of Injury
Determining Choice of Law in Toxic Tort Litigation........... 18
By Philip L. Harris and Jennifer L. Duglosz
When a Conflict of Law Arises....................................... 18

History of Choice of Law Rules......................................... 18
The Typical Approach.................................................. 19
Special Considerations in Cases Involving International Law .......................................................... 20
Different Law for Different Defendants......................... 21
Statutes of Limitation and Statutes of Repose .......................................................... 22
Properly Raising and Noticing Issues of Conflict of Laws.......................................................... 23
Conclusion..................................................................... 24

Lessons Learned From Legionnaires’ Disease Litigation
The Standard of Care Defense in Emerging Toxic Tort Claims.......................................................... 25
By Thomas P. Bernier and Susan E. Smith
What Is Legionnaires’ Disease? .............................. 25
What Is the Legal Exposure? ................................. 26
Standards of Care ....................................................... 28
What the Future Holds .............................................. 32

Defense Lawyers’ Wake-Up Call
Can FIFRA Preemption Be Revived? ......................... 33
By Lawrence S. Ebner
FIFRA’s Express Preemption Provision................. 34
EPA-Approved Product Labeling Is the Key to Federal Preemption .............................................. 34
What Bates Actually Held ........................................... 35
Scope of Post-Bates FIFRA Preemption ................. 36
Meaning of “Parallel” State Requirements .......... 37
Reviving FIFRA Preemption ................................... 38
Conclusion..................................................................... 39

Alive and Strong
Asbestos Litigation.............................................................. 40
By Joseph J. Welter, Susan E. Van Gelder,
Andrew J. Scholz, and Sean T. Stadelman
The “Every Exposure” or “Single Exposure” Theory .......................................................... 40
The Emergence of Multiple Distinct Exposure Lung Cancer Cases .............................. 42
Trial Consolidation: From Judicial Economy to Severe Prejudice .............................................. 43
Trial Strategies and Challenges in Apportionment Jurisdictions ..................45
Conclusion ........................................................................ 49

Misuse and Abuse of the Endangered Species Act and Its Species Listing Process ..........50
By Michael Grisham
Listing Under the ESA: the “Keystone” of Species Conservation ..................50
Because Listing Has Extensive Impacts, Activists Continue to Focus Resources on Influencing Listing Decisions .............52
What Lies Ahead: Suggestions for Making the ESA Work ..................55
Conclusion ........................................................................ 59

The Dark Side of the Crystal Ball
Issues Facing the Chemical Industry ..........60
By Michael P. Walls
Reform of the Federal Toxic Substances Control Act (TSCA) ..................60
Expanded Availability of Chemical Hazard Data and Information Will Underpin Some Consumer Decisions, and Possibly Litigation ..........68

Regulations and Laws in Flux
What's the Big Fracking Deal? ..........71
By Pamela W. Carter and David Hynes
What is Fracking? ..................71
How Big is Fracking? ..........72
Where is Fracking Occurring? ..........72
Current Federal Law: A Lot of Fracking Exemptions ..........72
EPA—Comprehensive Study from 2010 to 2014 ..........74
OSHA Silica Rule: Limits Cut in Half or More ..........75
State Law and Regulations ..........76
Particular State Law: Trial and Error? ..........76
Potential Liability ..........77
Insurance Issues ..........78
Conclusion ..........80

The Application of Genomic Sciences to Reveal the Invisible Agents of Harm ..........81
By Len van Zyl and Michael Zapata III
Genes, Diseases, and the Environment ..........82
What Is Next Generation Sequencing (NGS)? ..........82
NGS in Toxicogenomics ..........83
Scientific Admissibility ..........84
Types of Causation Claims ..........84
The ArrayXpress Strategy: Matching the Claims ..........84
How Does ArrayXpress Support Counsel? ..........85
Conclusion ..........85

Game Changer—Making the Invisible Visible
Genetics and Genomics ..........86
By Howard E. Jarvis, E. Paige Sensenbrenner, and Laura K. Whitmore
The Science ..........87
Applying the Science and Technology to Toxic Tort Litigation ..........88
Conclusion ..........90

Etiology Unknown
Using the Idiopathic Cause in Your Specific Causation Defense ..........91
By William E. Padgett
Excluding the Unknown Can Be Required ..........92
Soldo: A Model Case on the Idiopathic Causation Defense ..........92
Blood Cancers ..........92
Parkinson's Disease/Parkinsonism/Myelopathy ..........94
Autism/Autism Spectrum Disorders ..........95
But, the Idiopathic Cause Defense Is No “Silver Bullet” ..........95
Lessons Learned for Your Idiopathic Cause “Toolbox” ..........96

Enough Is Enough
Reining in the Substantial Factor Test for Causation ..........98
By Michele Kendus and Lucas Chrencik
Air Quality Modeling Evidence in Toxic Tort Litigation ..........100
By Jim Wedeking, David T. Buente, Jr., and Gale F. Hoffnagle
What Are Air Models? ..........100
How Air Models Are Used ..........103
Challenging Air Modeling Experts ..........104
